A screenshot of a terminal window running zsh. The prompt is 'meeting git:(main)'. The user has entered 'exa --tree --level=1 -a', which displays a file tree with '.git', 'baseStyle.css', and 'index.html'. The terminal title bar shows the path '/Users/alaricode/Documents/3 - Code/purple-code/meeting'.

```
< zsh 4 /Users/alaricode/Documents/3 - Code/purple-code/meeting 0
→ meeting git:(main) exa
baseStyle.css index.html
→ meeting git:(main) exa --tree --level=1 -a
.
├── .git
├── baseStyle.css
└── index.html
→ meeting git:(main) █
```
